

**United Counties of Leeds and Grenville  
County Road 43 Widening from 200m west of County Road 44  
to 220m east of Colonnade Drive in Kemptville  
Notice of Commencement of Detail Design**

The United Counties of Leeds and Grenville has retained AECOM Canada Ltd. to complete the detailed design for the four-lane widening of County Road 43 from 200m west of County Road 44 to 220m east of Colonnade Drive, in Kemptville, Ontario.

**Revisions and Addenda to Environmental Study Report**

In 2010, the United Counties of Leeds and Grenville completed a Schedule 'C' Municipal Class Environmental Assessment (MCEA) to facilitate improvements to County Road 43 and documented the process in the *Four Lane Upgrade of County Road 43, Kemptville Environmental Study Report (ESR)* (AECOM, 2010).

Due to the time lapse between the filing of the ESR in 2010 and the initiation of detailed design in 2020, AECOM has conducted a review of the planning and design and the existing environmental setting to ensure that the project and the mitigation measures are still valid given the current planning context.

An Addendum to the Environmental Study Report will be prepared to address the lapse of time and design modifications in accordance with the requirements of the Municipal Class Environmental Assessment (Oct. 2000, as amended 2007, 2011 & 2015) and will be made available for public review at a future date. A Public Information Centre (PIC) is also planned for early 2021 to provide an update on the study process and details of the Addendum. Advance notification will be provided.
