Seasonal Load Restrictions

During the spring thaw period, some roads within the United Counties of Leeds and Grenville cannot withstand heavy loads. The Counties load restriction is to reduce the allowable individual axle load **from 10 tonnes to 5 tonnes**. The load restrictions are in force every spring on those County roads that are posted with the appropriate signage.

This year, the reduced loads **will be in force beginning March 7, 2016** and will be lifted when the likelihood of road damage has diminished which is typically at end of April or early May.

For more information regarding the County roads that are affected by the restriction, please contact the Public Works Department at **613-342-3840**.
