Westport Storm Sewer Outfall Improvements Environmental Assessment Study

INTRODUCTION

The United Counties of Leeds and Grenville has retained Sanchez Engineering Inc. and BT Engineering Inc. to undertake Engineering Services for the reconstruction and drainage improvements for the Westport Storm Sewer Outfall. The project will complete the design for stormwater drainage system improvements to provide an adequate flow route for rainfall events that exceed the capacity of the storm sewer system and replace aging infrastructure that has reached the end of its service life.

PUBLIC CONSULTATION

Public consultation is vital to this Study. Anyone with interest in the project can provide input. An in-person Public Consultation Centre (PCC) is being held as follows:

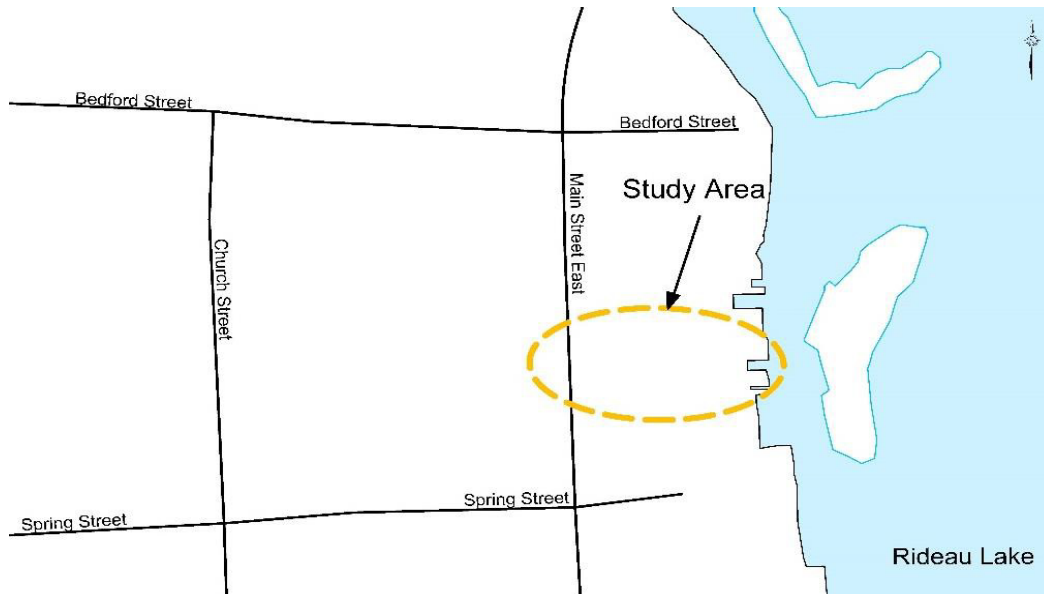

Date: January 30, 2024
Time: 6:00 pm to 8:00 pm (drop-in format)
Location: Westport Community Arena
37 Spring Street, Westport, ON K0G 1X0

There is an opportunity at any time during the Class EA process for interested persons to provide comments. Early identification of individual and group concerns greatly aids in addressing these concerns. This information is collected for the purpose of a public record as part of the Class EA process. Personal information you submit will remain confidential. Persons will be advised of future communication opportunities by electronic notice in addition to newspaper public notices.

January 12, 2024

STUDY PROCESS

The project has been initiated as a Schedule B Municipal Class Environmental Assessment (MCEA) (2023), based on the range of anticipated effects. If the investigations confirm that the existing sewer must be replaced, alternative alignments for the proposed storm sewer and outfall will be evaluated between the County Road 10 right-of-way (Main Street East) and Rideau Lake. The Study will proactively consult with the adjacent property owners, public, stakeholders and Indigenous Peoples.

For more information or if you wish to be placed on the study's mailing or emailing contact list, contact either:
